

Solution for the prevention and
treatment of anemia in cattle

Botanical Complex

Silice, Coumarins, Anthraquinones and Bioflavonoids

 **halsa**
bovine phytotechnology

What is **hålsa antianemic**?

Powerful botanical complex to prevent and treat the different types of anemia that affect cattle from birth to adulthood, based on Silice, Coumarins, Anthraquinones and Bioflavonoids developed with the most advanced phytotechnology.

Why **hålsa antianemic**?

In ruminants, iron deficiency is mainly due to chronic hemorrhages, caused by hematophagous parasites and chronic bleeding from the digestive tract or urinary tract. The main sign of this deficiency is a reduction in appetite and weight loss.

Indicated to treat of large animals in stage of growth, and adults with cases of acute and chronic anemia due to deficit of Iron, Cobalt, Copper, Vitamin B1 and / or Vitamin B12. Anemia due to hemorrhage, trauma, surgeries, parasitosis and / or food.

For what **hålsa antianemic**?

Its exclusive formulation based on plant extracts, essential amino acids, minerals and vitamins, accelerates the process of formation and maturation of red blood cells and hemoglobin, achieving rapid recovery of the animal.

Coadjutant in the therapy of Anemia and Reconstituent.
