

**Solution to improve and protect, swine
cattle's digestive / intestinal system**

**Botanical Complex Omega 3,6,9,
Uronic Mucilages, Cyanogenetic Glycosides**

 **gryslie**
swine phytotechnology

What is **gryslie intestinal digestive**?

Powerful botanical complex to stimulate the digestive / intestinal system in fattening pigs. based on Omega 3,6,9, Uronic Mucilages and Cyanogenetic Glycosides, was developed with the most advanced phytotechnology.

For what **gryslie intestinal digestive**?

Indicated to improve and protect the digestive / intestinal system of swine cattle that shows pictures of decreased appetite, weight loss, cramping and / or diarrhea. In pigs, intestinal inflation and oxidative stress are very common, since they are monogastric animals. In turn, they are exposed to countless potentially pathogenic and non-pathogenic environmental agents through water, air, and food, and contact with other animals, resulting in the activation of the innate intestinal immune system. To this is added the stress caused by weaning and competition to access daily food and great voracity and speed for eating it.

Why **gryslie intestinal digestive**?

Its exclusive 100% NATURAL formulation, combines active vegetable ingredients, with high concentrations of essential amino acids, minerals and vitamins. Strengthen the digestive / intestinal system of the animal, improving the absorption of nutrients, promoting growth and greater weight gain.

Your cattle will stay healthy without the need for antibiotics, corticosteroids, or pain relievers (steroids / non-steroids) by obtaining meat, suitable for human consumption.

gryslie intestinal digestive

the leading brand in swine cattle phytotechnology
