

Solution for avian respiratory disease

Botanical Complex

Gingerola, Phenolic Glycosides, Coumaric and Phelandrenic Acid

What is **vålfar respiratory**?

Powerful botanical complex to stimulate the Immune System in Commercial Layers, Broilers and Breeding Birds, based on Gingerola, Phenolic Glycosides, Coumaric and Phelandrenic Acid, developed with the most advanced phytotechnology

For what **vålfar respiratory**?

Indicated to improve respiration and vitality in high-performance birds, which present chronic cough, mucus and fatigue. Unlike bronchodilators, vålfar respiratory does not generate tachycardia or affect heart rate, recovering oxygenation in a 100% NATURAL way, without compromising the health of the animal.

Prevents infectious and respiratory diseases such as: Avian Flu, Infectious Bronchitis and Newcastle disease. In turn, it strengthens the respiratory system, which translates into greater efficiency and a better quality of life for birds.

Why **vålfar respiratory**?

Its exclusive formulation based on plant extracts, essential amino acids, minerals and vitamins, quickly relieves symptoms and injuries, achieving a rapid and effective recovery of the treated animal. Bronchopulmonary and mucolytic expectorant. Antihistamine, anti-inflammatory, analgesic and broad-spectrum antibiotic.

With vålfar respiratory, your farms will remain healthy and productive, without the need for antibiotics, obtaining meat suitable for human consumption.

vålfar respiratory

the leading brand in avian phytotechnology
