

Pro Collagen Vegan Basel

**A healthy and sustainable alternative
for a higher quality of life**

100% vegetable product based on marine phytoflora

Pro Collagen Vegan Basel

It is a powerful 100% vegetable phytonutrient based on marine phytoflora, designed to collaborate in the **natural and safe stimulation of collagen**.

Its exclusive production process from hydrolyzed marine phytocollagen, allows obtaining a **superior quality product suitable for everyone** (including vegans, celiacs, diabetics and people with obesity).

Unlike collagen of animal origin, vegetable pro collagen is more easily absorbed, due to its lower molecular weight.

Developed with the highest phytotechnology, **Pro Collagen Vegan Basel** is a 100% natural ingredient suitable for making dietary supplements and is characterized by being sustainable and free of allergens compared to animal collagen.

Innovation Basel - New opportunities for the market

- A new liquid and solid pharmaceutical form, which can be used as Final Product or Formula Intermediate Product.
- Ideal to be fractionated and marketed as supplemented with other formulations.

The regenerative power of nature

Properties of seaweed as a functional ingredient

Seaweed is a source of valuable nutrients, such as protein, vitamins and minerals, and has been consumed in Asia since ancient times. However, its main use in westerners countries has been as a gelling agent and colloid for the food, pharmaceutical and cosmetic industries.

In recent years, interest in seaweed as a functional food ingredient has increased due to its high content of dietary fiber and health-promoting compounds, such as omega-3 fatty acids and bioactive molecules. These compounds have antioxidant properties, anti-inflammatory, anticancer and antidiabetic, which makes them a natural source of great interest in the food industry.

One of the products that has been developed from marine seaweed is hydrolyzed pro collagen. This type of pro collagen is obtained through a hydrolysis process, which consists of breaking proteins into smaller fragments called peptides that stimulate collagen production and are more easily absorbed by the body compared to animal collagen. In addition, being extracted from a plant source, it is a more sustainable and accessible option for those who seek to avoid the consumption of products of animal origin.

Highly effective in improving the elasticity and hydration of the skin, as well as in strengthening hair and nails. In addition, marine Phyto flora based hydrolyzed collagen has been shown to be effective in relieving joint pain and improving mobility in people with arthritis.

Pro Collagen Vegan Basel

combines ancient wisdom and the highest phytotechnology to offer a unique supplement that stimulates the natural production of collagen in the body, strengthening and repairing connective tissues without compromising quality standards or the environment.

Pro Collagen Vegan Basel

The regenerative poder of nature

ADVANTAGES AND BENEFITS

- 100% vegetable product (phytonutrient)
- Suitable for all types of patients, without restrictions or intolerances.
- High content of essential amino acids, such as glycine, proline and hydroxyproline. Most effective for improving the health of the skin, hair and nails.
- Moisturizing, nourishing, regenerating, photoprotective and healing properties.
- More soluble, digestible, bioavailable compared to animal collagen.
- Does not provide calories, carbohydrates, or flavor (sugar and sweetener free)
- No risk of transmitting diseases of animal origin.
- Less preservatives and artificial additives, as it requires less processing.
- Natural and environmentally friendly product.

100% HEALTHY
GLUTEN FREE
FREE OF SWEETENERS
ANIMAL CRUELTY FREE
CLINICALLY PROVEN
QUALITY GUARANTEE
ORGANIC CERTIFICATION
VEGAN CERTIFICATION
KOSHER AND HALAL CERTIFICATION
